Art Unit: 1732

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maus et al -769 in view of Japanese document 61-66623, either alone, or further in view of Ratkowski essentially for reasons of record as set forth in paragraph 1 of the previous action.

2. Applicant's arguments filed January 30, 2004 have been fully considered but they are not persuasive. Applicant notes that the process claims were allowed without amendment in the parent case. However, the instant claims are directed to a product, not a process, albeit they are set forth in product-by-process language. Notwithstanding the prosecution in the parent case, it is submitted that the instant product is met by the combination of references as applied. While the processes disclosed therein may not exactly teach the instant process, it is submitted that they are close enough to form a product which the instant product would have been obvious over. The patentability of product claims is not dependent on process steps but rather structural or optical characteristics which the prior art would not meet. In the instant case, it is submitted that the instant product limitations are indeed met or obvious over the prior art for reasons already set forth.

3.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
